- VSCODE
- POSTMAN
- MICROSOFT WORD
- AZURE DEVOPS
- GIT & GITHUB
- THUNDERCLIENT
- MONGODB
- SERVER

## LANGUAGES

- ENGLISH
- URDU

## WORK EXPERIENCE

2023-2025

### Web Developer

- As a Web Developer at Freelance BWP Software House in Bahawalpur, I optimized website performance, ensuring faster load times, responsiveness, and scalability. I aligned development strategies with client objectives, prioritizing user experience and functionality. Collaborating with cross-functional teams, I delivered seamless digital solutions, resolved technical challenges, and maintained clean code practices to drive project success and stakeholder satisfaction.

### Projects

- Developed a full-stack e-commerce app (MERN) with optimized performance, secure sessions (JWT), and state management (Redux).
- Built a real-time task manager (ReactJS, Firebase) with drag-and-drop and secure authentication.
- Created a responsive portfolio (HTML/CSS/JS) with SEO optimization and CI/CD deployment via Azure DevOps.
- Developed a real-time weather dashboard (Node.js, OpenWeather API) with responsive design and error handling.
- Automated file organization using Python, reducing manual effort by 70%.
- Published open-source projects on GitHub, earning 150+ stars.
